Indiscretion of a Former Management in Its Embarrassment The Vice-President Thinks That It Will Reorganize

The European-American Bank, which has had a varied career at Dey and Greenwich streets since its organization, in Consolidation of boards of directors of 1907, was closed yesterday morning by the State Banking Department. It is not a large institution and the weight of a number of loans which were not paid on time was too great in the opinion of Supt. O. H. Cheney to warrant a continuance of the business, at least for the present. The officials of the bank blame a former management for unwise loans It is not suggested that anything but indiscretion in this respect was responsi-

le for the difficulties. Frank Zotti, the Croatian banker who got into trouble two years ago, when it was said that he had appropriated funds that his countrymen brought to him, The bank had a capital of \$100,000. At was issued yesterday:

had this to say about the difficulties into which the institution had been put: The loans upon which losses have been incurred were the result of the former management, the present management having been in charge for only about three months. At the time the present management took charge there were rediscounts of nearly \$300,000, and with the existing conditions in the money market it was found impracticable to care for the rediscounts as they came due. In the rediscounts as they came due. In my judgment the bank will reorganize on

a much more solid basis."
The affairs of this institution attracted the attention of the Banking Department about two weeks ago. Weekly reports on all the banks under its supervision ful examination would not be superfluous in this case. On Friday a special inquiry was made, with the result that the officials were ordered not to open their doors for business yesterday. The special deputy
